

May 24, 1958

Dear Boris:

I am enclosing thermofax copies of proof on your paper, as just corrected and returned. If you find any other serious errors, I suggest you put them in colored ink on your copy and send to Porter.

I am also making an order for 500 reprints at our expense. You can have as many of these as you want. **

Will you let us know your precise travel plans for the summer, when you have made them? We are planning to leave Madison about July 28 for Paris, Stockholm London Glasgow Montreal and home about August 31.

I am really very sorry your negotiations with Kalokar went no further; the whole thing had to be managed in too great haste. I know he is still interested and some arrangement, which I am certain would be to your advantage, may still be possible.

** We probably need only 100-200 here, depending on requests. If you would prefer to have them shipped directly to Santiago (and you should be able to pay for this as well as for these or more reprints if you want from your own NIH grant) let me know immediately and contact the business office of the Journal at Waverley Press, Baltimore 2, Md., referring to paper "JB 2532" as well as title and author.

Our best to R. & J. too

Yours,

Joshua Lederberg
